

Home Automation

Smart home technology is not only for your alarm system and thermostat; it is now available for your windows.

Budget Blinds, North America's largest window covering provider, and Lutron®, one of the most respected names in smart home automation have teamed up to give you the best when it comes automated window treatments. This partnership will allow you to integrate smart home technology in a fashionable way with automated window coverings in stylish colours and fabrics. Smart Shades by Budget Blinds can be the start of your home's transformation into a smart home. Here are four major benefits you can expect with home automation.

1. Peace of Mind

With home automation you can control almost everything in your home from securing your alarm system to controlling your window coverings. Smart home technology can provide a certain level of comfort - after all, your home is the place you should feel the safest. With the help of smart home systems, you're able to turn lighting on or off and open or close your window coverings at all times to make it seem like someone is home even when you're not. It is a way for technology to provide peace of mind when it comes to your family and their safety.

2. Convenience

Your household may be chaotic, but smart home technology is here to make life a whole lot easier. Having these systems in your home make it easy for you to enjoy

automated lights, shades, even music at the touch of a button or with a simple command. This technology was invented to simplify your everyday life.

3. Energy Efficiency

Did you know that you can save money on your energy bill with home automation? It's estimated that we lose over 50% of our home's heating and cooling through the windows. So rather than cranking up your heat or air conditioning to avoid uncomfortable temperatures in your home, consider automated Smart Shades by Budget Blinds. These automated shades can be controlled with the touch of a button or with your favorite smart phone or tablet.

4. Child Safety

As a parent your number one concern is your child's safety. It is important to not overlook basic household items such as window coverings when child proofing your home. Smart home technology can be a major benefit for parents. Having automated shades by Budget Blinds can eliminate dangerous dangling cords out of a child's reach keeping them safe around all windows.

Simply put, smart home technology is life changing. From security and light control to child safety, the benefits are endless.
