## Spring is Upon Us!

It's that time of year when, for us, hockey season is winding down and the hopes for warmer, longer days are on the horizon! The smell of spring is in the air and you begin to yearn for those outdoor projects and activities.

Nothing starts the spring off more than the Brandon Home and Leisure Show! This show, to me, is the start of many things; warmer weather, seedlings starting to spout, and new projects around the house start building up on the to do list. It can be the start of new beginnings for you and your family for many of these reasons! This year our list is still long, after moving into our new home. We hope to one day complete the list, but this year the yard will be the focus! From moving dirt to planting trees, we will have our work cut out for us.

As a family, we love to wander, browse and meet new people at the Home Show every year. In our business, it seems to be the time to run into old friends as well! This is the perfect time to talk face to face with local professionals in regards to questions you may have or to seek recommendations for your project. Exhibitors take the utmost pride in their booths; where you have the opportunity to touch, experience and test out gadgets, blinds, stone, saunas, cars and more! Where else can you do that all in one place! The exhibitors that come to the Brandon Home and Leisure Show are a wealth of

knowledge, take advantage of that and stop in to check out what is new this year.

If you are looking for a new gadget or looking to build a new home, the Home Show has what you need!
