

Considering a Sunroom?

Sunrooms can create a room in your home that are as comfortable as any other, yet as close to nature as possible without enduring the elements.

Photo Submitted by Elite Sunrooms

A sunroom can offer a peacefulness to your free time that you cannot find anywhere else. Moreover, it can offer some great health benefits. Exposing our bodies to the sun boosts vitamin D production. Building a sunroom would allow you to enjoy the benefits of the sun without having to endure the cold winter weather.

There are many things to consider when drawing your sunroom plans from construction materials to contractors who can get the job done. It is important to think about every step of the process while working on your sunroom plans.

Many contractors have a variety of pre-made sunroom plans and kits at their disposal. Contacting a local person or business would give you the option of asking questions, planning, and getting an immediate price estimate for your sunroom. They would also be able to give you the best advice on what type of sunroom would work best in your location. You have to consider the elements where you live

when purchasing a sunroom for your home, in order to get the most out of your purchase.

Make sure you choose the best location for your sunroom. Installing it in the wrong location can cost you on your energy bills during the cold winter months. Conversely, installing it in a location that gets full sun may make it unbearably hot during summer months. Most likely, this is a purchase you'll want to enjoy year-round. Do some research to decide where your sunroom would best be located.

If you have decided on a 4-season sunroom, choose a colour scheme similar to your own home, so it flows nicely and doesn't stand out. When making furniture choices, lean towards typical interior furnishings to make it feel like another room in the house. A typical sunroom can add a couple hundred square feet onto your existing house and can be used as an addition living space for you and your family.

Outdoor access with indoor comfort can be yours with a sunroom.

We specialize in building quality sunrooms and patios designed to fit your budget and your lifestyle.

We carry the exclusive Weather Master® Vertical Four Track Window System which opens from top or bottom & allows 75% ventilation.
