

Predictive WATERING

With over 40 years of service in the Westman area, D & B Sprinklers is the one to call for all your irrigation needs. They provide system installation and service for residential, commercial, sports fields and golf courses. Their impeccable customer service is what puts them as a leader in their industry, right along side offering up to date, high quality systems.

The most innovative product on the market for your irrigation needs is Hydrawise. It is an industry leading irrigation system with WIFI control. The benefits of

Hydrawise are that it automatically adjusts watering based on highly accurate, internet-sourced local weather data. Based on the local forecast and past history, this system can save you up to 50% of water consumption a year by accurately watering your lawn. Your system will adjust based on the local forecast, rain probability, wind and humidity to supply your lawn with the precise amount of water.

Hydrawise has created an easy-to-use app that gives you the ability to monitor your irrigation system from anywhere in the world. If you have a smart home set up and want to go hands free, you can add it to your smart home device and operate your system with voice control.

If Hydrawise detects an issue with your system, it will notify you with an alert. Feel at ease knowing that if you have a broken pipe or faulty wire, your system will notify you before it becomes a problem.

Technology is expanding every day, why not use it to your advantage and have a system that benefits you.
