

# HEART of the Home

Written By Jaime-Lynn Dyck

The kitchen is definitely the heart of the home in this beautiful new build by R&M Homes. The kitchen was designed by Scott Gurr of BdnLux Kitchen & Design. Scott has 26 years in the cabinet business and is a great new addition to the BdnLux family.

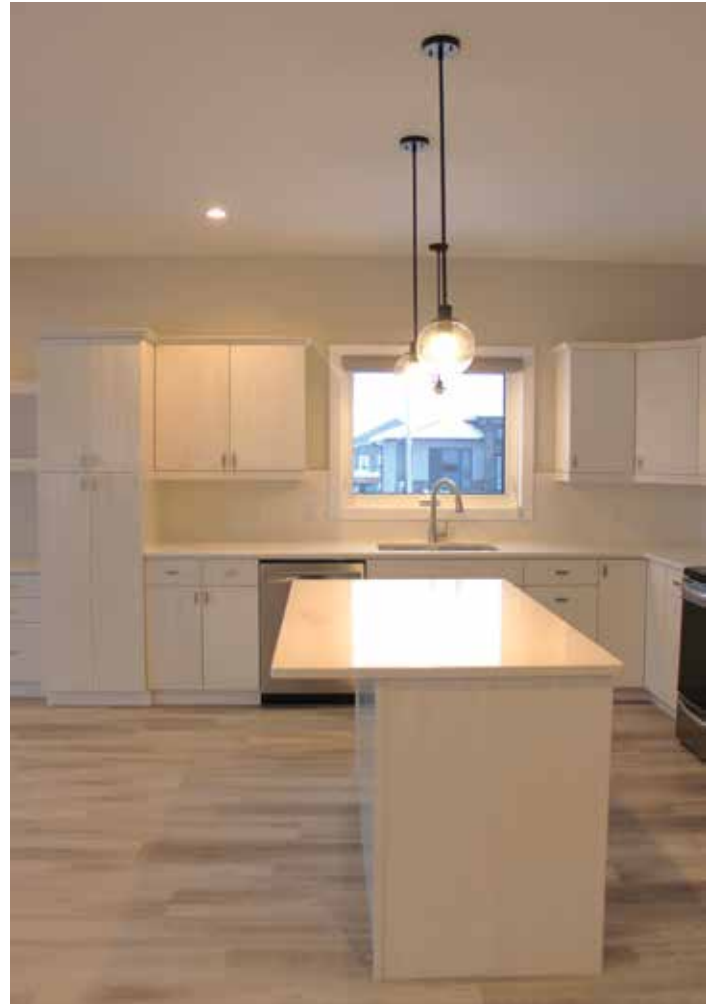

The smooth, sleek lines of the kitchen stand out with the wall-to-wall flat slab maple cabinets. The Millstone finish keeps the space bright but also adds some visual texture. The large, one-level island is a perfect working station and is consistent with the cabinet finishings to maintain continuity.

Quartz countertops are the perfect choice for busy families as they are durable and resistant to scratches, chips, and stains. An under-mount sink keeps with the smooth lines of this kitchen and makes clean-up easy. The design is finished with a timeless white subway tile backsplash.

Soft-close drawers and doors are another family-friendly component in this kitchen. They prevent little fingers from being pinched, and the soft-close mechanism will prevent wear and tear on your cabinets, extending their life. The pantry has rollout shelving making all items very accessible.

Scott really enjoyed designing this kitchen with the new owners. The workstation was a great addition to this space. It boasts ample desktop space, with cabinets flanking the bottom on each side, perfect for file storage. Floating shelves above lighten the space and are perfect to display personal items.

Scott has experience in all aspects of the cabinet business from designing, colour matching, building, and installing. He enjoys working with clients and making their ideas come to life. Scott brings with him a wealth of knowledge from the industry and is looking forward to learning new things. If you are in the market for a new kitchen, make sure you stop by BdnLux Kitchen & Design and talk to Scott.

### *Create Your Signature Style*

We pride ourselves on creating custom, personalized designs that will bring your kitchen to life. We provide a hands on approach to every project, large or small. From the design process, to material selection, delivery and install, we take care of every last detail.
