Emjay Homes has once again delivered a beautifully crafted residence, this time completing a custom on-site build that showcases the company's attention to detail, craftsmanship, and ability to bring a homeowner's vision to life.

The project began when the homeowner approached James at Emjay Homes with a design that couldn't be transported as a Ready-to-Move (RTM) home. Instead, Emjay's team collaborated with the homeowner to build the home on-site, ensuring every detail was tailored to their preferences. The result is a 1,500 sq. ft. home with soaring 10-foot walls, offering a spacious open feel without an oversized footprint.

Inside, the home is filled with thoughtful upgrades and refined finishes. At the heart of the living space is a wood-burning fireplace framed by custom cabinetry. The cabinetry work throughout is some of the most extensive Emjay Homes has ever completed. Featuring hidden appliances in the kitchen, seamlessly tucked behind cabinet doors, extra-tall cabinets finished with elegant crown molding, and a dining room hutch. Quartz countertops in the warm Gold Rush colour bring a touch of luxury to the kitchen, while hardwood flooring adds both beauty and durability to the design.

With three bedrooms and two baths, the home offers comfort and functionality for everyday living. The layout balances modern convenience with timeless craftsmanship, making the space feel both inviting and practical.

The exterior of the home is just as striking as the interior. Finished in Canexcel siding in Granite, paired with sleek black windows, slate grey soffit and facia, and Fusion stone accents, the design is completed with wood-look garage doors that tie everything together. A spacious three-car attached garage, fully finished, enhances both curb appeal and practicality.

This project is a testament to Emjay Homes' ability to adapt and execute complex builds with precision. From the detailed cabinetry to the smart use of space, every element reflects the company's dedication to quality and custom design. For the homeowner, it's not just a house, it's a dream realized, built by a team that takes pride in every nail, every detail, and every finishing touch.

We Build Custom Ready to Move Homes and Onsite Projects.
